BILBAO AS FABRIK TRANSFER NETWORK brings together 4 cities from 4 different countries that want to assemble the ultimate approaches in the field of the smart specialization in Industry 4.0 and digital economy.

The project, funded by the European Regional Development Fund (ERDF), involves the participation of Bielsko-Biała (Poland), Tartu (Estonia) and Timisoara (Romania), that will be inspired by the experience of Bilbao with AS FABRIK, a project conceived to increase the competitiveness of the local KIBS (Knowledge Intense Business Services) sector and prepare them to supply the digital transformation demands of the manufacturing sector (Industry 4.0).

A successful strategic alliance based on knowledge and innovation that aims to improve the local ecosystems of cities, with city businesses, universities, local service providers and entrepreneurs hosted in a tailor-made innovative space which now is time to share.
